Broadcasting Real-Time Auctions

Welcome

Hello everyone. Please allow me to say "thank you" for taking time to review our offering for 2026 and consider this your personal invitation to attend our bull sale on March 31st South of Kensington, KS. While 2026 will be the first time we've offered bulls in a live event format, this will be the 9th annual Brent Charolais bull sale, and 33rd year raising registered Charolais bulls. Over the years, one of the biggest rewards in the business has been the opportunity to meet a lot of good people and make new friends. If your available, I sincerely hope you will come out and enjoy the day with myself and all of the people on the crew that help keep things moving.

As I consider the cattle that will be offered, and the goals that have been involved in their breeding, the word that comes to mind is balance. While it's the goal to advance the genetics as aggressively as possible, I believe it's important not to forget that these bulls have to go out on real ranches and earn their keep. The Brent Charolais cow herd runs on native pasture and crop residue most of the year. The cows calve outside with minimal supervision. Most of the sires are owned breeding bulls, so we get to see first hand the feet, fertility, breeding nature, and overall performance of the genetics selling. If there is a problem with the genetics, I want to know about it so our customers don't.

For the past few years the cattle have been developed in partnership with Cedar Valley Farms and the Slavik Family. Todd has been using Brent Charolais bulls for several years now, and in addition to developing breeding heifers, this partnership has allowed us to finish the cull calves and collect even more real world profitability information on our cattle. Whether it be breeding bulls, replacement heifers, market cattle, or crossbred feeders sired by Brent bulls, they will all be on location and available to view, good, bad or ugly. If you have any questions, or would like to come see the bulls in advance of the sale, please call anytime.

Thank You,
Matthew Brent

Welcome to the Inaugural Live Auction, hosted by Brent Charolais. As Matthew has grown his herd and continues to improve his quality, we decided to make the move to a live auction. Our plan is to continue to refine this event and grow it into the future. I have had the pleasure of knowing Matthew for several years, since my time with the AICA. He is a detail oriented cattleman that hold his cows to the highest standards. His entire program is centered around breeding cattle that work for the commercial producer.

Matthew does the majority of the ranch work by himself or with limited assistance. That means the cattle must be hassle free and easily managed. His breeding philosophy is structured around growth and carcass without sacrificing maternal strength. His bloodlines represent some of the best genetics that the breed has to offer.

We want to invite you to the Cedar Valley Feedlot on March 31st, for our inaugural live auction. If Matthew or I can be of assistance, please do not hesitate to reach out.

See you on sale day,

Cott Keffer

CK Sales & Marketing, LLC.

Age Advantaged Bull- The leadoff bull in the inaugural Brent Charolais live auction is a sleep all night, calving ease bull, who checks all the boxes. He is long spined, deep sided, and well built. Not only does he excel in his calving figures, but he also offers growth and carcass merit. His dam is a first calf heifer out of the senior herd sire, RBM Keystone H41.

The next run of bulls are sired by the great RBM Keystone H41, the anchor herd sire for Matthew. Keystone is a very popular bull that has sired high sellers in the states and Canada. This aged bull offers growth and carcass merit, along with a look of quality. If you retain ownership on your cattle, please make note of this bull.

Another complete, no-holes bull, with tremendous upside. I appreciate the frame and length of this bull, in tandem with his well above average growth and carcass EPD's. His dam is bred for maternal strength, if you retain any females, this should be a bull to look at.

Lot 23 is a high performing bull with a modest 82 lb. birthweight. His 842 lb. weaning weight and 116 ratio correlates to breed leading growth EPD's. As a bonus, this bull ranks in the top 4% for his MARB EPD. If you want feeder cattle that grow and grade, take a look at this bull.

Age Advantaged Bull- Lot 24 is a special individual. He is sired by the very popular SVY Historic and out of RBM Jasmine F251, the dam of the heavily used RBM Keystone H41. This bull was born at an offsite E.T. facility and had a bad start. Since he got to Matthew's he has absolutely exploded. This bull offers as much genetic potential as anything you will find this spring. Retaining one-quarter semen interest.

This is a purebred Charolais bull that will sell unregistered. Lot 25 is an extremely good calving ease prospect. He boasts just a 70 lb. birthweight and grew to almost 800 lbs. at weaning. We feel that he could be a solid dual-purpose bull.

Being that this is our first live auction, I talked Matthew into offering a special group of open heifers. We sorted these five off the top of the replacement pen, and we feel that they are exceptional. Lot 27 is sired by Historic and out of an excellent Keystone cow. Her phenotypic advantages are only surpassed by her EPD profile. This is a donor cow in the making.

This is a very good female with a bright future. Her sire, RBM Keystone, is leaving a tremendous set of daughters across the continent. Keystone has for sure left his mark on the Brent herd. This is a high growth heifer that boasts a big time TSI figure. Maternal brothers to this female have sold to Weaver Ranch, Aurora, Ks and Marcos Ek, Sparta, Mo.

75%	95%	2%	4%	6%	3%	3%	4%	2%

Lot 29 is an extremely good female that will add value to any operation. She is maternal in her build and has a good look from the side. She excels in several EPD traits including WW, YW, MILK, MTL, CW, REA, MARB & TSI. Maternal brothers have sold to repeat customers including Weaver Ranch and Crow Ranch.

7%	30%	15%	20%	30%	35%	15%	20%	20%

This is a Liberation daughter that reads with more calving ease. Additionally, her growth and carcass EPD's are all within the top one-third of the breed as well. Her dam is a direct daughter of WC Rushmore 6548; he was a sure shot heifer bull for years and left an excellent set of daughters.

15%	10%	15%	15%	5%	15%	35%	75%	20%

I like this female quite a bit. She is a shot younger but has all the parts to be an excellent cow. Her EPD profile reads with calving ease, growth and maternal. Also, she ranks in the upper echelon of the breed for her TSI.

PROFIT STARTS

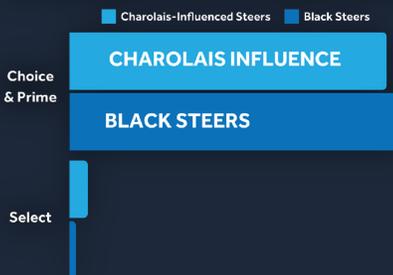

HERE

Charolais bulls achieve Yield Grade premiums while continuing to deliver on quality:

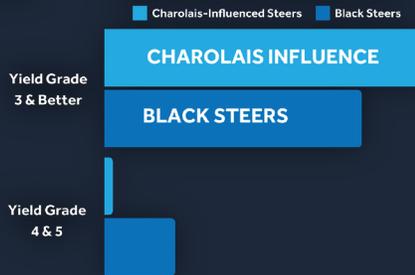

- Packer preferred for increasing red meat yield and carcass weight without sacrificing quality grade.
- Delivering the ability to reduce days on feed with efficient feedyard performance and feed conversion.
- Providing the ability to outperform at weaning for more dollars per head, no matter the market.
